RE: SANITARY SEWER CUSTOMER NOTIFICATION/OUTREACH

The Borough of Somerset and the Municipal Authority of the Borough of Somerset received direction from the Pennsylvania Department of Environmental Protection (PA DEP) on October 1, 2020 to address hydraulic overload conditions within the sanitary sewer system. The Borough and Authority will have to perform cleaning, inspection, and construction activities throughout its service area to comply with PA DEP's direction. The Borough and Authority will be following a Corrective Action Plan to eliminate the hydraulic overload condition. A summary and schedule of Corrective Action Plan activities is attached for your reference. This has been a common occurrence in most municipal systems due to the age of the infrastructure and the intensity of rainfall events across the region.

The Borough and Authority are providing notice to all sanitary sewer customers that various construction personnel, Borough personnel, and other representatives will be completing various activities related to the sanitary sewer system for the next several years. The Borough and Authority recognize this work may cause inconveniences and they greatly appreciate your patience.

Due to the pandemic, we are unable to hold “in-person” meetings to discuss these projects, so the Borough and Authority intends to periodically update all sanitary sewer customers as they work through this process. Please visit our website www.somersetborough.com for more information pertaining to upcoming sanitary sewer projects and other Borough matters. You may also reach us by phone at 814-443-2661.

Sincerely,
Borough of Somerset
