RE: IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
PWS ID#: 4560042

The Borough of Somerset and the Municipal Authority of the Borough of Somerset are notifying each customer within the Borough's system that we are required to monitor your drinking water for specific contaminants on a regular basis. Regular monitoring are an indicator of whether or not our drinking water meets health standards.

We collect two samples for TTHMs (Total Trihalomethanes) and two for HAA5s (Haloacetic Acid) on a pre-authorized quarterly schedule each year. The four samples were scheduled to be taken on July 12th, 2019. Due to multiple main water line breaks that week, the samples were taken on July 22nd, 2019. No action is needed to be taken by the customer and no alternative water supplies were needed. The results for each sample were in compliance based upon the limits established for Safe Drinking Water Standards; however this notice is to inform you that we collected the samples outside of the seven day monitoring window.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have any additional questions, please feel free to contact our office at 814-443-2661.

Respectfully,

BOROUGH OF SOMERSET

Michele A. Enos
